

Employee Onsite Program

As a convenient and customizable solution, we provide all the necessary components and support to enable employee participation as healthy control donors. We also handle all pre-screening, informed consent, privacy, and regulatory requirements. Here is a summary of what will go into launch and running of a program on your site.

Prep Checklists

Pre-Launch

- Assemble designated program support team
 - Onsite phlebotomists
 - Clinical research coordinators
 - Customer success manager
- Prepare the informed consent and authorization form for employee donors and requesting researchers
- Determine location of onsite sample collection room
- Create sponsor-specific landing page for employee donors to sign-up
- Create sponsor-specific sample request submission form for researchers

Launch

- Produce and distribute announcement flyer to all employees with sign-up information
- Announce the availability of a short program orientation for requesting researchers
